SINGAPORE, 24 MAY 2022 – The Fullerton Hotel Singapore has recently received the prestigious Green Mark GoldPlus Award from the Building and Construction Authority (BCA), a recognition of The Fullerton Hotels and Resorts' commitment towards the built environment and the operation of a sustainable property.

The BCA Green Mark certification is a green building rating system designed to evaluate a building's environmental impact and performance. Additional criteria include innovation, energy and water efficiency, indoor environmental quality and the adoption of other green features.

“This accolade is a wonderful testament to our Fullerton team's dedication towards maintaining high environmental standards throughout our hotel operations. We will continue to uphold

these standards and identify new opportunities to improve our carbon footprint in alignment with national roadmaps such as the Singapore Green Plan 2030 and the recently launched Hotel Sustainability Roadmap, and to actively encourage our guests to do the same,” said Mr Gino Tan, Country General Manager of The Fullerton Hotels and Resorts.

The Green Mark GoldPlus award is also aligned with the hotel’s commitment towards achieving key goals in the Sustainability Vision 2030 (SV2030) by Sino Group, the parent company of The Fullerton Hotels and Resorts. Launched in 2020, the SV2030 outlines sustainability goals which support the Group’s vision of “Creating Better Lifescapes” through key pillars of Green Living, Innovative Design and Community Spirit. These goals include the reduction of single-use plastic consumption by 50 percent across all business lines by 2022 (from the 2017 level), and the reduction of electricity consumption by 30 percent by 2030 (from the 2012 level).

SUSTAINABILITY INITIATIVES AT THE FULLERTON HOTEL SINGAPORE

The Fullerton Hotel Singapore is committed to creating a greener future through sustainable practices that have been put in place. Green initiatives that have been implemented include:

- Retrofitting the hotel’s air-conditioning system to Green Mark certified water-cooled chillers, which has helped to achieve better energy efficiency;
- Upgrading the lighting system to LED lights in 2021, which has helped to lower energy consumption and achieve energy savings;
- Using alternative or reusable materials to replace single-use plastic items in guestrooms, dining outlets and meeting venues, as well as eliminating the use of plastic bottles across the hotel;
