[WELLNESS CENTER]

Welcome to the mystical Lahari Wellness Center at Cala Luna Boutique Hotel, where the vibrant energy of the jungle meets the healing waters of the ocean. We are a full-service holistic center where we hold the space and intention for renewal, relaxation, recovery, balance, and alignment with your Higher Self. You are your own greatest healer.

We see you. We see all of you, and our intention as a holistic center is to nourish and support your entire being, body, mind, and spirit. We are energy, we are vibration, and we are the elements.

You were born with an innate healing ability. Our philosophy is rooted in the ancient wisdom of Traditional Chinese Medicine, where your body is an integrated entirety; each part is a necessary and integral part of the whole. Your connectedness to nature is absolute; elements are part of our bodies, reflecting natural changes. Our bodies are energy; we have 72,000 energy Nadis in our bodies. There are 12 main energetic Channels that we work within our therapies. To open up the energy flow and restore balance to the organ and emotion associated with each, bringing harmony and balance to mind, body, and spirit.

Our energetic body consists of seven major energy centers, or Chakras, through which our life force energy flows. Each Chakra is located in a different part of the body and is responsible for specific organ and emotional functions.

With love and intention, our holistic therapists offer beautiful sessions that include a variety of unique techniques and tools to heal and transform your being physically and energetically. Soothing touch brings you to experience deep levels of relaxation, peace, surrender, and transformation. We invite you to indulge and delight your senses as our therapists work their magic with various sounds and vibrations, essential oils, and herbs.

Our Master Holistic Practitioner, Marianela Ortiz, trained all our therapists to design and develop this beautiful program. Marianela has over 40 years of experience mastering the healing arts, wellness studies, bodywork modalities, yoga/holistic movement, and transformational music performance. She is a visionary creator, pioneering founder, and revolutionary leader in Holistic Wellness and as a Wellness Manager.

As a Holistic Health Coach, she offers consultation for those who may have questions or are interested in creating a customized and personalized holistic healing program suited for your specific physical, mental, and emotional needs.
